**Vishal Narain**  
**Dr. Narain** is Associate Professor at the School of Public Policy and Governance at the Management Development Institute, Gurgaon, India. He holds a PhD from Wageningen University, the Netherlands. His research and teaching interests are in inter-disciplinary analyses of water policy and institutions, integrated water resource management, and periurban issues. His current research focuses on the gendered impact of drinking water supply interventions, the impact of rural-urban transformations and urbanization processes on gender relations, and the gender-based division of labour. He is investigating how urbanization processes impact the workload of rural women, how these are further shaped by male outmigration, and the resultant effects on time allocation between domestic and agricultural work. Vishal has published in a range of international journals, received the SR Sen Prize for the best book on agricultural economics and rural development from the Indian Society for Agricultural Economics, was lead author for UNEP’s Global Environment Outlook–4, and is currently co-editing books on globalization and water governance in South Asia and Indian water policy at the cross-roads.
