

ECONOMIC INSTRUMENTS FOR GREENING DEVELOPMENTS

Developments in Greening Accounts

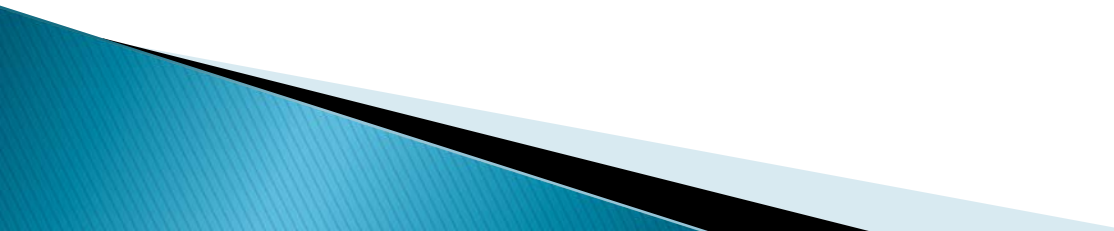

**Paro, Bhutan
12-13th Aug 2012**

PRESENTATION OUTLINE

- Development of Environmental Statistics (ES) and Environmental Accounting (EA), and integration with National Accounts?
 - Strategies and Approaches considered
- 

Rationale

- NSB's main functional mandates so far were in the field of poverty, economic growth, price and other ad-hoc surveys and census related works.
 - 11th FYP – to promote self Reliance and Inclusive Green Socio-Economic Development” 11th FYP by leveraging our geo-economic advantages“
 - As the sole statistical agency – ensure we've enough data/indicators necessary to account and report environment together with our national accounts statistics.
- 

Strategies and approaches

- Capacity building in developing EA & ES.
 - Danish Assistance under Transition Support Program 2012–2014
 - Project will be taken up in two separate parts:
 - Protocols for development of National Data Bank; and
 - Introduction of the System of ES and EA.
- 

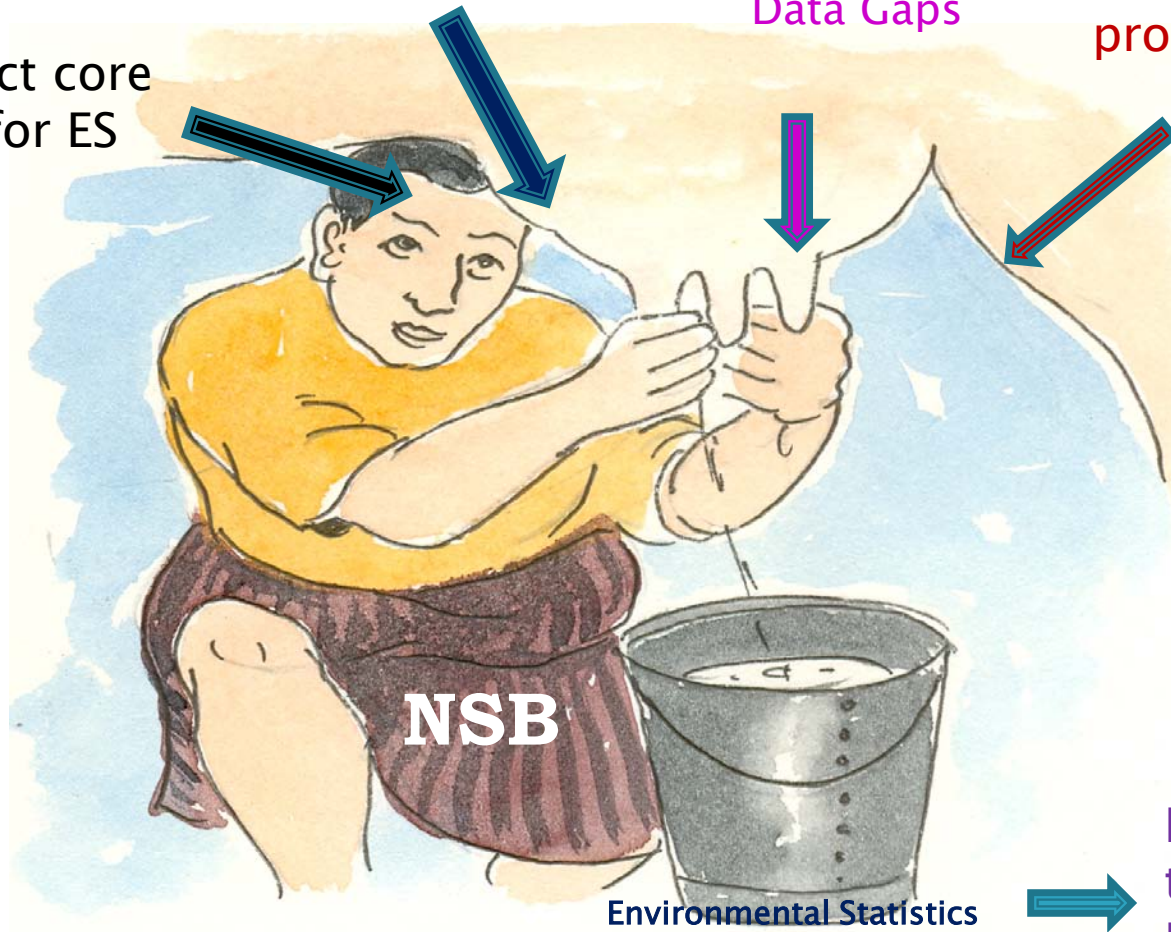

Strategies & Approaches

1. Collect core data for ES

2. Consultation with key Stakeholders

3. Assess, Collect and Compile existing Environmental Data sets and Identify Data Gaps

4. Develop Data protocols/indicators

NSB

Environmental Statistics

Document ES in the National & District Level Year Books

Environmental Accounting
