Training

Glacier monitoring (field-based and remote-sensing tools), Pakistan

Dam breach modelling, Nepal

Environmental impact assessment for sustainable hydropower development, Nepal

Analyzing cryospheric data, Nepal

101

Individuals trained

70 men

31 women

Promoting sustainable hydropower development in Nepal

Cryosphere and society: Integrating the social sciences into physical cryosphere research

125

Academics and community members attended the International forum on cryosphere and society

66

Datasets publicly available through the Regional Database System

11 scientific papers published

13 web articles

Launched HKH CryoHub
